ABOUT US

Healthease

OUR MISSION STATEMENT:

"Commitment to Quality"

The focus vision of NEOMEDIC is applying advanced technologies for the development of high quality products at the most affordable prices in the field of health care. The Healthease range conforms to our standards for safety, convenience and user-friendliness, providing high quality for the discerning health professional and medical consumer who is cognizant of true quality.

NEOMEDIC has roots that date back more than 30 years with an ethos based on strong principles of appreciation, commitment, communication, dedication, integrity, reliability, responsibility, understanding, and finally unity. Our roots are in our family foundations and our principles are key ingredients of a strong and successful family. Likewise, any business founded on the basis of these strong family principles is likely to survive the trials and tribulations of economic cycles as well as be in a position to provide continuous support to its customer base.

Our humble beginnings were in the distribution of pharmaceutical and medical products in various African countries as agents to various multinational companies from where we expanded into our own brands and the manufacture of our own products. The company has now grown into various divisions spreading over several continents and various countries serving customers with the same family like principles of its founding members. Today, depending on the country of distribution, we are involved in the manufacture of pharmaceutical products, surgical products, cosmetics, consumables as well as medical devices.

Despite our growth and success over time, we rely on our founding principles to guide us in the spirit of service to our customers.

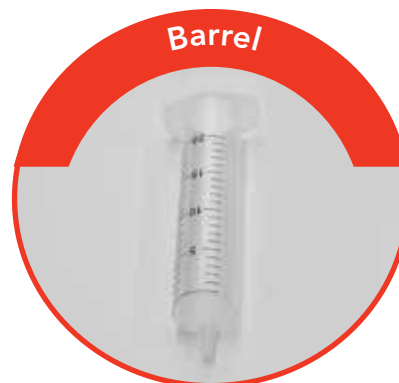

- **Appreciation:** Every member in a family must have a sense of appreciation for one another. This principle extends to our business whereby every member of our organisation has a deep founded sense of appreciation for one another which allows for a better workflow and finally a superior and more complete product. This sense of appreciation culminates in our attitude to our customers.
- **Commitment:** This aspect of family while important with respect to human relations in our business also reflects in our outlook on our products and customers. We remain committed always to our products ensuring the highest quality standards and likewise commitment to our customers is tantamount to our quality principles.
- **Communication:** While important in every organisation for efficiency and a smooth operation, we also are persistent with this aspect when it comes to our customers. We promise to listen to the needs of our customers, assess their concerns, and respond within a reasonable period of time.
- **Dedication:** When members of any organisation portray this characteristic, the result is a more successful outcome. Our focus is to foster a culture of dedication within every individual in our organisation, and consequently the best possible outcome for our products and customers.
- **Integrity:** Achievements cannot be long term without integrity. Our vision is to be here today, tomorrow, and for years to come with the intention of serving our customers with honesty. Our scruples play an integral role as part of our values.
- **Reliability:** We depend upon one another within our company to complete our tasks and embrace our responsibilities to the best of our abilities. Our customers can rely on us as a company that will be there to communicate with them and provide reliable products, feedback, and service.
- **Responsibility:** We are responsible to each other in our company and likewise we are responsible to our customers, consumers, and distributors for our actions and products. Human error is understandable and natural, however without responsibility there is no fix.
- **Understanding:** As the world continuously evolves, so does everything in it including companies, products and all living matter. Understanding how to handle change, accept change, and evolve with this becomes a very important aspect of survival. Without understanding, it is impossible to embrace change and move forward for the better good of all.
- **Unity:** We've all heard of "united we stand, divided we fall" and as clichéd as this may sound, there is a lot of truth in the phrase. At our company we stand united in blame, united in praise, and most importantly united behind our customers and distributors.

In summary, we are a company with strong principles and we promise to go above and beyond your expectations. Our uncompromising commitment to 100% customer satisfaction is testament to our loyal customer base and we look forward to welcoming you to our family.

Healthease Plus Syringes 3 Part

Healthease Syringes are made from non-toxic medical grade polypropylene/ polyethylene designed for its compatibility with medication. Such high-grade material in conjunction with modern manufacturing techniques, provides for a robust syringe with excellent watertight properties. All Healthease 3 Part Syringes are latex and PVC free indicating that the additional black gasket found in 3 part syringes specifically is always guaranteed latex free. Healthease Syringes assimilate the following features that conform to our standards for safety, convenience and user-friendliness, providing high quality for health care professionals.

Difference Between Eccentric & Concentric

Luer Lock syringes allows for the needle to be twisted onto the tip and be locked securely into place

Luer Slip syringes allows for the needle to be mounted by means of sliding the needle onto the tip of the syringe

Tip is located centrally on barrel of the syringe

Tip is offset towards the edge on the barrel of the syringe

Healthease Plus

0.5ml Insulin Syringe

With 29G Fixed Needle

PRODUCT INFORMATION

- Non-toxic medical grade polypropylene / polyethylene designed for its compatibility with medication
- Single Use
- Sterilized by E.O. Gas
- Non Pyrogenic
- Individually barcoded blister pouch
- Safety Cap on needle
- Needle is integrated with the barrel
- Clear visible markings enable accuracy for dosage measurement and administration
- U-50 marking
- Latex/PVC free
- Needle Size: 29G x ½ " (0.33 x 13mm)

PRODUCT CODE	DESCRIPTION	PACK SIZE	NAPPI CODE
NHPSCT-60ML	60ml Syringe Catheter Tip	20 pcs per box	176689001

PRODUCT BARCODE

In appearance the catheter tip syringe is similar to the luer slip syringe but with longer, more tapered tips. The tapered nature of these syringes allows to form a tight seal during use. The catheter tip syringes are used for cleaning catheters, gastronomy tubes, and other devices as well as for wound irrigation.

Healthease Syringes 2 Part

Healthease syringes are made from non-toxic medical grade polypropylene/ polyethylene designed for its compatibility with medication. Such high grade material in conjunction with modern manufacturing techniques, provides for a robust syringe with excellent watertight properties.

Healthease syringes assimilate the following features that conform to our standards for safety, convenience and user-friendliness, providing high quality for health care professionals.

Healthease Hypodermic Needles

Healthease needles are ground on high precision machines designed to create superior sharpness, and therefore ensure injections with minimal pain.

Safe use of this product assumes prior training in its use. Used cannulae may be contaminated and should be disposed of in puncture-resistant containers. Do not re shield used needles, and obtain appropriate medical attention in case of sharp injury.

Healthease Dental Needles

Dental needles are used to deliver local anesthetic to the operative site. A sharp needle minimizes patient discomfort during the injection of liquid anesthetics, while the needle's high-break resistance allows it to be bent for access to hard to reach places.

Heathese

Dental Needle

PRODUCT INFORMATION

- Single use
- Sterilized by E.O. Gas
- Non Pyrogenic
- High break resistant needle
- Ultra sharp needles for accuracy and comfort to minimize patient discomfort during dental treatment

Healthease IV Admin Solutions

Intravenous (IV) therapy plays a vital role in the care of patients; however today with modern techniques and advanced technology these are no longer just confined to hospital use alone. Our goal is to provide for safe infusion therapy from venous puncture to infusion for whatever purpose, be it for administration of fluids, medication, transfusion therapy, or nutritional support. As we continue to grow this range to include catheters, flow regulating devices, and other variations of administration sets, we will continue to keep the safety of health care professionals and patients in mind.

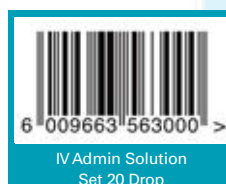

Healthease IV Admin Solution Set 20 Drop - Adult

PRODUCT INFORMATION

- Vented 20 drop
- 2 piece rotary male luer lock
- Contains 1 latex free Y-site injection port for intermittent medication

Healthease Patient Monitoring

At Neomedic we continue to develop and expand our range of patient monitoring devices. Today the Healthease range of patient monitoring devices cover a range from blood pressure measurement devices to fever management. Healthease patient monitoring devices aim to assist consumers and medical professionals to make the necessary changes required to avoid life-style related diseases and at the same time improve health in a variety of areas. Our goal is to assist people in using medical data to take responsibility for their well-being and further develop tools to enhance this process.

Healthease Air Management

At Neomedic, our Healthease Air Management range is dedicated to utilizing the latest technologies to enable medical professionals and patients alike in managing inhalation therapy to assist in the treatment of asthma and other respiratory conditions. Our range covers nebulizers that are an extremely efficient form of depositing medication with less coordination than that required by MDIs or dry powder inhalers resulting in uniformly deposited medication in the upper and lower respiratory tract for maximum effect. Our oxygen concentrators with the optional nebulizer function are effective devices that separate oxygen from air to provide supplemental breathing oxygen to individuals with chronic lung disease. Accessories such as nebulizers, oxygen cannulas and masks as well as an electronic aspirator supplement the range.

Healthease

NEBU mist Nebulizer

PRODUCT INFORMATION

- Suitable for inhalation therapy to treat asthma, chronic bronchitis and other respiratory illness
- Reaches even the deepest regions of the lungs
- Effective medication delivery

Plasterman Range

The Healthease Plasterman range covers products that fall under the areas of orthopaedics, compression therapy, and wound care. As the lines within the range expand we continue to cater for all sectors, be it for medical professionals, young children, older adults or simple everyday products such as the little plaster that you need for a graze or a cut. All Plasterman products are born from the same ethos at the core of our company "commitment to quality". This commitment can be found in simple gauze rolls and compresses to the various bandages and tapes with specific purposes from wound care management to sporting needs.

Elastic Adhesive Bandage

PRODUCT INFORMATION

- EAB are well suited for dressing retention as well as conditions that require compression treatment and limitation of movement
- Ideal for ankle taping, knee taping, hand taping and wrist taping
- Provides reinforcement for strains, sprains, weak joints and allows firm and easy maintenance of directional tension
- Suitable for use in correction of false position and posture as well as compression for varicose veins
- Strong porous adhesive and stretch ability keeps the bandage firmly adhered throughout lengthy treatment and allows the bandage to conform to body contours and joints
- The distinctive centre line permits accurate overlap during application made from high quality extensible cotton cloth with soft fluffy edges that ensure no cuts or marking of the skin
- Each roll individually wrapped in a colour and barcoded wrapper
- Available in 4.5m length upon request
- Colour- white

Healthease Plasterman

Synthetic Orthopedic Padding

PRODUCT INFORMATION

- 100% Polyester padding with a water-shedding ability that helps to keep skin dry due to low moisture absorbency and therefore minimizing skin maceration
- Soft and high loft with a high fleece density, providing superior cushioning and patient protection as well as reducing the risk of rubbing and cast sores
- Excellent conformability for easy application around awkward contours, minimizing patient trauma and ensuring a smoother finished cast
- Easy to tear helping conformability and easy application, reducing the risk of stressing a fracture when finishing any padding application.
- Paper wrapped and therefore convenient for autoclaving in case a procedure requires sterility
- Compatible with all casting materials, POP, synthetic, fibreglass and thermoplastics
